
Overview

Serial ports on USB allow further use of existing devices, even when the computer doesn't offer serial ports. The high speed serial port with the 128 byte FIFO allow high speed communication, even in heavy loaded systems. Unique features reduce the system load. The serial port also allows unusual speed settings like 500.000bps.

Features & Benefits

- DB9 male ports
- Speed up to 921.6 kbps
- External power supply needed

Hardware Specifications

Ports:	Four RS232 port
Speed:	Up to 921.6 kbps
RS232 Signals:	TxD, RxD, RTS, CTS, DTR, DSR, DCD, GND
Power:	External power supply, 6V DC required. Adapter included, 12V not possible.
Driver:	Windows 98, ME, 2000, XP, 2003 Server Linux (Kernel 2.4 and up built-in)
Connectors:	Four DB9 male
